

Luis Vegas

Full Stack Engineer

(+58) 416-621-3500 | luisvegasmor@gmail.com | [linkedin.com/in/luisvsg](https://www.linkedin.com/in/luisvsg) | github.com/luisvgs

EDUCATION

Universidad Bicentenaria de Aragua

BSc in Systems Engineering

Miranda, Venezuela

2016 – 2021

EXPERIENCE

Full Stack Engineer | Typescript, Node, Nest.js, Three.js, Docker.

2021 – 2023

Sitio Uno

Caracas, Venezuela

- Developed a web application in which users are able to schedule a demo to try the employer's product, as well as to search and apply for job positions.
- Contributed to the design and development of an application that enables users to preserve and share their memories posthumously within a chosen network of friends, either publicly or privately. Implemented secure payment functionalities to facilitate subscription services.
- Actively contributing to the modernization of our existing infrastructure through the development of new microservices and the enhancement of existing ones.

Full Stack Engineer Intern | Ruby, Javascript.

2020

Vikua

Caracas, Venezuela

- Implemented new features for the next major version of my employer's Ruby on Rails based application.
- I obtained invaluable software development experience, as well as agile practices from the engineering team and my mentor.

PROJECTS

Marta | *Rust*

- A statically typed programming language with functional programming features: github.com/luisvgs/martta

Evidence | *Scala, Akka*

- A CLI tool for easily tracking and visualizing the latest bugs reported: github.com/luisvgs/evidence

Jules | *Rust*

- A statically typed Lisp dialect. github.com/luisvgs/jules

Nocion | *Rust, Tokio, Notion API*

- A wrapper library around the Notion API for easy page and database handling: github.com/luisvgs/nocion
