# Luis Vegas

**Full Stack Engineer**

(+58) 416-621-3500 | luisvegasmor@gmail.com | linkedin.com/in/luisvsg | github.com/luisvgs

## EDUCATION

**Universidad Bicentenaria de Aragua**                                    Miranda, Venezuela
*BSc in Systems Engineering*                                                *2016 – 2021*

## EXPERIENCE

**Backend Engineer** | NestJS, Typescript.                                    2024 - Present
*Global Resources*                                                          *Caracas, Venezuela*
- Playing an active role in the development and implementation of new features for our clients' applications.

**Full Stack Engineer** | Typescript, Node, Nest.js, Three.js, Docker.            2021 – 2023
*Sitio Uno*                                                                  *Caracas, Venezuela*
- Contributed to the design and development of an application that enables users to preserve and share their memories posthumously within a chosen network of friends, either publicly or privately. I also implemented secure payment functionalities to facilitate subscription services.
- Actively contributing to the modernization of our existing infrastructure through the development of new microservices and the enhancement of existing ones.

**Full Stack Engineer Intern** | Ruby, Javascript.                                2020
*Vikua*                                                                      *Caracas, Venezuela*
- Implemented new features for the next major version of my employer's Ruby on Rails based application.
- I obtained invaluable software development experience, as well as agile practices from the engineering team and my mentor.

## PROJECTS

**Marta** | *Rust*
- A statically typed programming language with functional programming features: github.com/luisvgs/martta

**Evidence** | *Scala*
- A CLI tool for easily tracking and visualizing the latest bugs reported: github.com/luisvgs/evidence

**Jules** | *Rust*
- A statically typed Lisp dialect. github.com/luisvgs/jules

**Nocion** | *Rust, Tokio, Notion API*
- A wrapper library around the Notion API for easy page and database handling: github.com/luisvgs/nocion

## RELEVANT COURSES

**AWS Certified Solutions Architect Associate**
*Udemy and Adrian Catrill*                                                    *2023*

**MongoDB Associate Developer.**
*Mongo University*                                                            *2023*

## TECHNICAL SKILLS
