

Luis Vegas

Full Stack Enginner

(+58) 416-621-3500 | luisvegasmor@gmail.com | [linkedin.com/in/luisvsg](https://www.linkedin.com/in/luisvsg) | github.com/luisvgs

EDUCATION

Universidad Bicentenaria de Aragua

BSc in Systems Engineering

Miranda, Venezuela

2016 – 2021

EXPERIENCE

Full Stack Engineer | Node.js, Angular, Java, Spring Boot.

Global Resources — Telefónica Movistar

2024 - Present

Caracas, Venezuela

- Maintained and extended internal applications for Telefónica Movistar. Implemented new microservices and developed scalable front-end and back-end components while ensuring code quality through SonarQube.

Full Stack Engineer | Java, Typescript, Node.js, Three.js

Sitio Uno

2020 – 2023

Caracas, Venezuela

- Developed dynamic and responsive web applications using Typescript, NestJS, Java, and Three.js for 3D rendering. Contributed to the enhancement and maintenance of existing microservices to improve performance and scalability.

Full Stack Engineer Intern | Node.js, Java, Vue, Ruby.

Vikua

2019 - 2020

Caracas, Venezuela

- Improved code readability across legacy Java microservices and ported several from Node.js to Ruby, enhancing maintainability and aligning with updated architecture goals.

PROJECTS

Marta | Rust

- A statically typed programming language with functional programming features: github.com/luisvgs/martta

Evidence | Scala

- A CLI tool for easily tracking and visualizing the latest bugs reported: github.com/luisvgs/evidence

Cubika | Haskell

- A dependently typed programming language. github.com/luisvgs/cubika

Nocion | Rust, Tokio, Notion API

- A wrapper library around the Notion API for easy page and database handling: github.com/luisvgs/nocion

RELEVANT COURSES

AWS Certified Solutions Architect Associate

Udemy and Adrian Catrill

2023

MongoDB Associate Developer.

Mongo University

2023

TECHNICAL SKILLS

Languages: Java, Typescript, Elixir, Rust, OCaml, Scala, Python, Bash.
