

Luis Vegas

Full Stack Engineer

(+58) 416-621-3500 | luisvegasmor@gmail.com | linkedin.com/in/luisvsg | github.com/luisvgs

EDUCATION

Universidad Bicentenario de Aragua

BSc in Systems Engineering

Miranda, Venezuela

2016 – 2021

EXPERIENCE

Full Stack Engineer | Angular, Spring Boot.

Telefónica Movistar

2024 - Present

Caracas, Venezuela

- Playing an active role in the development of internal products, enhancing customer support for Telefonica devices. Provided integration for Jenkins CI/CD pipelines, ensured code quality with Sonar, and developed scalable, user-friendly interfaces and backend services.

Full Stack Engineer | Typescript, Node, Nest.js, Three.js.

Sitio Uno

2021 – 2023

Caracas, Venezuela

- Contributed to the design and development of an application that enables users to preserve and share their memories posthumously within a chosen network of friends, either publicly or privately. I also implemented secure payment functionalities to facilitate subscription services.
- Actively contributing to the modernization of our existing infrastructure through the development of new microservices and the enhancement of existing ones.

Full Stack Engineer Intern | Ruby, Javascript.

Vikua

2020

Caracas, Venezuela

- Implemented new features for the next major version of my employer's Ruby on Rails based application.
- I obtained invaluable software development experience, as well as agile practices from the engineering team and my mentor.

PROJECTS

Marta | Rust

- A statically typed programming language with functional programming features: github.com/luisvgs/martta

Evidence | Scala

- A CLI tool for easily tracking and visualizing the latest bugs reported: github.com/luisvgs/evidence

Cubika | Haskell

- A dependently typed programming language. github.com/luisvgs/cubika

Nocion | Rust, Tokio, Notion API

- A wrapper library around the Notion API for easy page and database handling: github.com/luisvgs/nocion
